

iCAP™

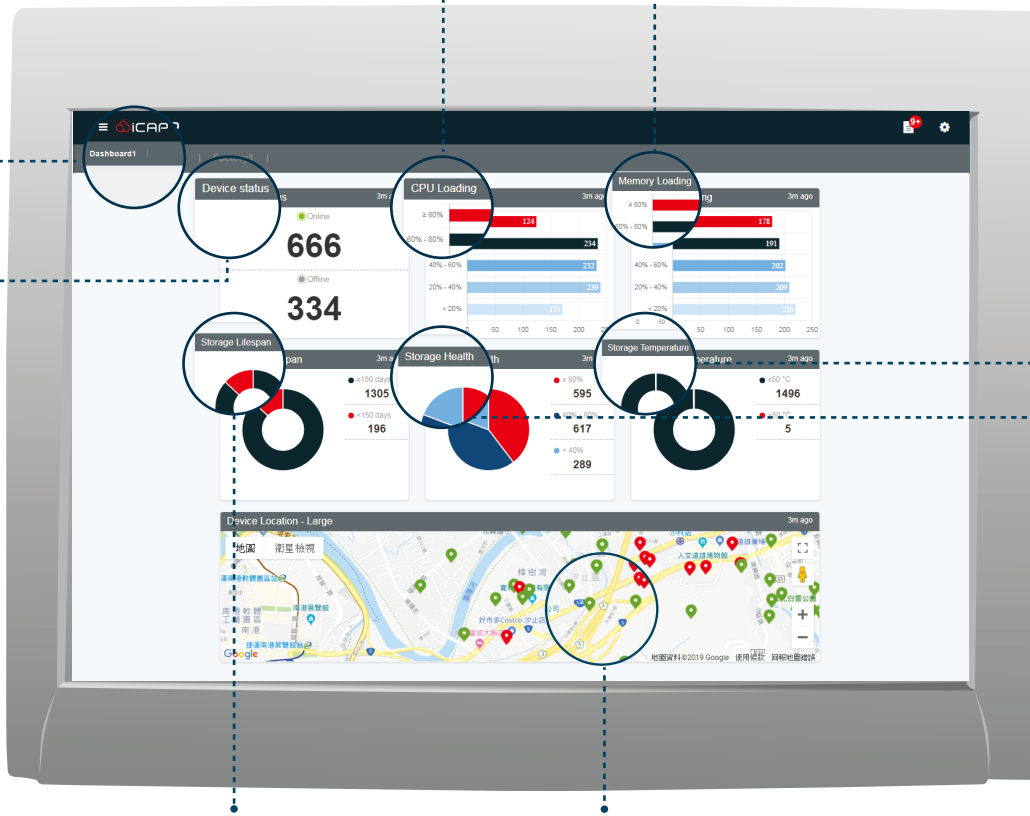

Innodisk Cloud Administration Platform
The Future of Cloud-Based Management

The web page allows multiple dashboards that enable the user to easily manage connected devices through supported browsers

Keep tabs on current CPU and memory loading

Effectively monitor remote device status

User-friendly monitoring function allowing the user to manage and analyze storage information lifespans in detail

By analyzing the read/write behavior of connected storage devices, iCAP can accurately predict remaining storage device lifetime

Customizable widgets including gauges, Google Maps, and various tables presenting device data

iCAP Advantages

Extensive Compatibility

The iCAP agent is supported on both Windows and Linux platforms and can be seamlessly accessed through a wide range of browsers

Flexible Dashboard

The user can freely alter the dashboard through a dynamic UI and device grouping and choose the parameters and widgets relevant to their application

Effective Event Tracker

The event notification tracker will log all changes and keep the user up-to-speed, enabling aswift resolutions to any issues that may occur

Benefits

- **Smart Management**
The dashboard view and device grouping function makes management easy, intuitive and convenient
- **Efficient Prediction**
iCAP integrates with Innodisk's firmware algorithms to accurately predict remaining storage device lifetime and will alert the user by email of any changes
- **Quick Maintenance**
In the event of a system error or instability the remote recovery function can quickly revert to default working status
